Please find below and/or attached an Office communication concerning this application or proceeding.

***Response to Amendment***

1. The reply filed on October 30, 2003 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Applicant failed to properly address the objection to the specification for containing an embedded hyperlink on page 3 of the reply. In particular, MPEP § 608.01 (Hyperlinks and Other Forms of Browser Executable Code in the Specification) states, "If hyperlinks and/or other forms of browser-executable code are embedded in the text of the patent application, examiners should object to the specification and indicate to applicants that the embedded hyperlinks are impermissible and require deletion." The examiner recommends the following:

- Delete “, by Paul Bourke, November 1999, available at the Internet page addressed as <http://astronomy.swin.edu.au/pbourke/opengl/stereogl/>.” from the paragraph appearing on page 7, at line 18 and replace the phrase with -- . --.
- Applicant should submit an Information Disclosure Statement PTO-1449 referencing the embedded hyperlink noted above with a copy of the document.
- Furthermore, regarding claim 1, line 11, the examiner recommends applicant change “it” to “said 3D output signal”.

See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Art Unit: 3713
